RE: Letter of Reference for e2o Health

To Whom It May Concern:

I am writing this reference for e2o Health who is currently leading the EMR implementation at our medical group. At the present time we are very satisfied with their work and interest in the success of the implementation.

We spent over 3 months working with e2o Health before implementation. First they helped in identifying an EMR product (NextGen) to suit our needs. Afterwards we went through a contract negotiation phase, laying out what each party expected of the other. We found the e2o Health team to be professional and worked diligently with us to come up with a mutually satisfactory agreement.

Since that time, e2o Health has spend a few weeks identifying our workflow, document the requirements and set up the EMR software. They are currently in the process of configuring the software to our needs and we are looking forward to training in the coming 2 months.

We find e2o Health to be extremely interested in our interests and enjoy working with them. We appreciate their leadership and dedication of the organization. We will be using the EMR in a meaningful useful way later this year and we thank e2o Health, in advance, for their role.

Should you have any questions that I can answer about e2o Health's services or personnel do not hesitate to contact me.

Sincerely,

Craig Kaner, MPA, CMPE
