Re.: Letter of Recommendation for Sunny Saran and E2O Health

To Whom It May Concern:

It is my pleasure to enthusiastically recommend the services and expertise of Sunny Saran and his E2O Health company.

Over the past month I've had the enjoyable experience of being lead by Sunny and his team in the implementation of our new electronic medical records system, NextGen.

Their presentation has been smart and well paced. To be specific, all of us health practitioners, along with additional classes for support staff, have been taught over a sufficient time with delivery in bite size pieces – making it all easier to grasp and understand how to make full use of the program.

Sunny and his crew have also taken the time to help us identify and learn the appropriate templates for our different specialty areas and accordingly lead us through them as it pertains to our routine workflows.

E2O Health has been great and now they're going into the next phase with one-on-one assistance in each of our clinic areas to aid directly and immediately to fully assure our smooth orientation to the program.

Please feel free to contact me with any questions.

Sincerely,

Robert Curtis, D.C.

Department Head - Chiropractic and Rehabilitation Services
